

Viking Mice Audio Script

Apparently, eh mice, eh according to a report, eh, let me just get this absolutely right, it's from a a Scientific American story, eh, mice, Viking mice sailed as far as Greenland, according to Elena Jones of Uppsala University in Sweden and her colleagues. They looked at the eh, what's called the mitochondrial DNA from mice skeletons or mouse skeletons on Iceland and Greenland, dating right back to the Viking heyday, which was about a thousand to ehm, twelve hundred years ago, and ehm, they compared that DNA with that of known Viking mice from the UK and Norway, and what they realised was that eh these Viking mice travelled all over the world. Everywhere Vikings went, mice went with them.
